Rialto, CA 92377 | manzoramosjavier@gmail.com | +1 (909) 961-1900

GitHub: github.com/DrManzo | Brand: Typhon's Forge

PROFESSIONAL SUMMARY

Detail-oriented and motivated QA-focused technology professional with hands-on experience in software development, debugging, software validation, multi-agent AI systems, and cross-functional coordination. Builder of production-level systems including a local-first AI operating system (Djinn) and an AI-driven 3D manufacturing orchestrator (Typhon's Forge). Brings strong technical depth in Python, C#, C, and VB .NET alongside a background in quality control, process documentation, and workflow improvement. Thrives in Agile-style environments and brings a builder's mindset to every testing and validation task.

TECHNICAL SKILLS

- **QA & Testing:** Manual testing, software validation, defect identification, debugging, regression-minded analysis, test documentation, quality control
- **Programming:** Python, C#, C, VB .NET, Bash/Shell scripting, object-oriented programming
- **AI & Systems:** Multi-agent orchestration (OpenClaw), local LLM deployment (Ollama, DeepSeek, Qwen, Llama), prompt engineering, system architecture design
- **Development Tools:** Git/GitHub, Docker, VS Code, PyCharm, Ubuntu/Linux, Discord API, AutoCAD
- **3D Manufacturing:** FDM 3D printing, OpenSCAD geometry scripting, automated plate nesting, print job orchestration, STL rendering and optimization
- **Other:** Agile/sprint workflows, technical writing, bilingual English/Spanish, stakeholder communication

PERSONAL PROJECTS

Djinn — Local-First Multi-Agent AI Operating System

Personal Project | 2024 – Present

- Architected and developed a local-first, sandboxed personal AI operating system combining OpenClaw orchestration, Ollama model hosting, and multi-agent task routing across research, development, and knowledge management.
- Implemented centralized access control and routing logic, enforcing safe autonomous operation and production integrity across all agents.
- Integrated cloud models (Claude, DeepSeek, Gemini) alongside local models (Qwen2.5, Llama) with intelligent cost-based escalation.

Skills: Python, multi-agent architecture, system design, Ollama, OpenClaw, Docker, Ubuntu, Bash, Git/GitHub

Typhon's Forge / Typhon's Studio — AI Manufacturing Orchestrator

Personal Brand & Project | 2024 – Present

- Designed and built a complete AI-driven 3D manufacturing system featuring 5 specialized sub-agents: design generation (OpenSCAD/Python geometry), engraving, plate packing/nesting, prototype optimization, and design editing.
- Developed a Discord-to-printer pipeline that accepts natural language commands, classifies intent via LLM, routes to the correct agent, and triggers physical 3D print jobs autonomously.
- Implemented STL rendering, print job tracking, variant generation, and plate optimization as a fully integrated local production system.
- Operates as a YouTube and content brand (Typhon's Forge) demonstrating AI-manufacturing integration.

Skills: Python, FDM 3D printing, OpenSCAD, Discord API, multi-agent orchestration, LLM integration, Git/GitHub

PROFESSIONAL EXPERIENCE

Human Resources Assistant (Part-Time)

HR Expert Consultants, Ontario, CA | October 2023 – Present

- Reviewed timesheets, approvals, onboarding materials, and employee records with close attention to accuracy and compliance.

- Supported recruiting, employee orientation, training sessions, and policy implementation across daily HR operations.
- Assisted with file maintenance, cross-team communication, and special projects requiring detailed follow-through.

Project Engineer

Walton Electric Corp. | April 2025 – June 2025

- Prepared RFIs and supported project managers and superintendents with technical documentation and field communication.
- Assisted with product information, logistics coordination, pricing, and quoting support.
- Gathered and communicated project details between directors and field personnel to improve execution accuracy.

Interior Designer / Customer Service Representative / Consultant

Cubicle and Office, Rancho Cucamonga, CA | May 2023 – April 2025

- Worked directly with clients to gather requirements, develop layouts, and deliver solutions aligned with cost and project goals.
- Led a \$75,000 Samsung project in Fullerton, CA, independently managing design coordination, negotiations, and implementation.
- Served as primary liaison between clients, installers, and management to reduce errors and maintain project continuity.

Intern Software Developer

DjinnStudio | May 2017 – March 2018

- Developed and maintained clean, efficient code across software projects in a collaborative development environment.
- Analyzed and debugged code to improve functionality, reliability, and user experience.
- Applied cybersecurity-minded development practices to support system integrity.
- Served in both project coordination and lead programming support roles.

General Construction / Logistics / Quality Control

CV Windows | July 2012 – March 2018

- Performed installation, servicing, and field support while maintaining quality control standards.
- Assisted with training new employees and reinforcing safety and efficiency procedures.
- Coordinated with supervisors and management to improve workflow reliability and operational consistency.

EDUCATION

High School Diploma

Wilmer Amina Carter High School, Rialto, CA | May 2012

CERTIFICATIONS & ADDITIONAL QUALIFICATIONS

- Cyber Security Analyst Certificates — University of La Verne
- Fluent in Spanish (reading, writing, speaking)
- Active open-source GitHub contributor: github.com/DrManzo
