Professional Summary

Detail-oriented and motivated QA-focused technology professional with experience in software development, debugging, software validation, documentation, and cross-functional support. Skilled in identifying issues, improving workflows, and supporting quality outcomes through testing-minded analysis, technical troubleshooting, and clear communication. Brings hands-on experience with Python, C#, C, and VB .NET, along with a strong foundation in quality control, project coordination, and process improvement.

Core Skills

- Manual testing and software validation
- Debugging and troubleshooting
- Python, C#, C, VB .NET
- Object-oriented programming
- Software documentation
- Quality control and defect identification
- Agile workflows and sprint support
- Project coordination and process improvement
- Bilingual communication: English and Spanish

Professional Experience

Human Resources Assistant (Part-Time) | HR Expert Consultants, Ontario, CA | October 2023 – Present

- Review timesheets, approvals, onboarding materials, and employee records with close attention to accuracy and compliance.
- Support recruiting, employee orientation, training sessions, and policy implementation across daily HR operations.
- Assist with employee file maintenance, communication between management and staff, and special projects requiring organization and detailed follow-through.
- Contribute to process consistency, issue resolution, and workplace support through strong documentation and coordination skills.

Project Engineer | Walton Electric Corp. | April 2025 – June 2025

- Prepared RFIs and supported project managers and superintendents with technical documentation and field communication.
- Assisted foremen and office teams with product information, logistics coordination, pricing, and quoting support.
- Helped gather and communicate project details between directors and field personnel to improve execution accuracy.
- Contributed to organized project support in both office and on-site environments.

Interior Designer / Customer Service Representative / Consultant | Cubicle and Office, Rancho Cucamonga, CA | May 2023 – April 2025

- Worked directly with clients to gather requirements, develop practical layouts, and deliver solutions aligned with cost, usability, and project goals.
- Led a \$75,000 Samsung project in Fullerton, California, managing design coordination, negotiations, and implementation support.
- Served as the primary liaison between clients, installers, and management to reduce errors and maintain project continuity.
- Provided consulting support for layouts, training, installations, and customer issue resolution.

Intern Software Developer | DjinnStudio | May 2017 – March 2018

- Developed and maintained clean, efficient code for software projects in a collaborative development environment.
- Analyzed and debugged code to improve functionality, reliability, and user experience.
- Participated in meetings to align software work with project goals and organizational needs.
- Applied cybersecurity-minded practices to support system integrity and secure implementation.
- Served in both project coordination and programming support roles.

General Construction / Logistics / Quality Control | CV Windows | July 2012 – March 2018

- Supported loading, offloading, installation, servicing, and field operations while maintaining quality control standards.
- Assisted with training new employees and reinforcing safety and efficiency practices.
- Worked with supervisors and management to improve workflow coordination and operational reliability.
- Supported project and logistics coordination across daily work activities.
